FIFTEENTH

ANNUAL REPORT

OF THE

State Board of Education,

SHEWING THE CONDITION OF THE

PUBLIC SCHOOLS OF MARYLAND,

For the Year ending September 30, 1881.

ANNAPOLIS
FROM THE STEAM PRESS OF L. F. COLTON.
1882.

STATE OF MARYLAND,

OFFICE OF THE STATE BOARD OF EDUCATION,

Baltimore, January 14, 1882.

To His Excellency, WM. T. HAMILTON,

Governor of Maryland.

SIR: I have the honor to transmit to you the Annual Report of the State Board of Education for the school year ending July 31, 1881, and the fiscal year ending September 30, 1881, with accompanying documents, as required by law.

Very respectfully,

Your obedient servant,

M. A. NEWELL,

Secretary.

Report of the State Board of Education.

The following summary, in connection with the accompanying tables, exhibits, in a condensed form, the most important facts connected with the administration of the public school system of the State, including the city of Baltimore, for the year ending September 30, 1881, so far as such facts can be presented in figures:

Number of schools in Baltimore city.....	120	
" " in the counties	1,919	
Total.		2,039
Being a decrease in 1881 of..... 6		
Number of different pupils, city.....	47,048	
" " " counties	111,861	
Total		158,909
Being a decrease in 1881 of.....3522		
Highest number enrolled in one term, city.. ..	35,630	
" " " " counties.	91,277	
Total		126,907
Being a decrease in 1881 of.....5765		
Average number in daily attendance, city	29,424	
" " " " counties..	50,315	
Total		79,739
Being a decrease in 1881 of.....6039		
Number of teachers, city..... ...	824	
" " counties.....	2,356	
Total.....		3,180
Being an increase in 1881 of.....55		
Number of months schools were open, city	10	
" " " " counties.	8 2-3	
Average for the State.....		9 2-6

Amount paid for teachers' salaries, city	$507,081 56	
" " " " counties ...	655,347 92	
Total		$1,162,429 48
Being an increase in 1881 of $20,676 92		
Amount paid for building, repairing and furnishing school-houses, city.....	$86,115 26	
Amount paid for building, repairing and furnishing school-houses, counties.....	88,568 71	
Total.....		$174,683 97
Being an increase in 1881 of $18,456 42		
Amount paid for books and stationery, city.....	$35,475 88	
" " " " counties.	44,861 89	
Total.....		$80,337 77
Being a decrease in 1881 of...$4,918 11		
Amount paid for rent, fuel and incidentals, city.	$53,248 35	
" " " " " counties.	46,350 95	
Total		$99,599 30
Being an increase in 1881 of $11,380 98		
Total expenses for Public School purposes, city.	$681,921 05	
" " " " " counties.	922,659 72	
Total		$1,604,580 77
Being an increase in 1881 of. $60,213 82		

Of the total expenditures by the city ($681,921.05)—

The current expenses of white schools amounted to.....	$562,458 68
" " colored " "	60,531 17
The expenditure for building and repairs was.....	$58,931 20

Excluding the city of Baltimore, the county schools show the following results:

Number of schools.....		1,919
Same as last year.		
Total number of scholars enrolled.....	111,861	
Decrease.....		2,504

Highest number enrolled in one term.....	91,277	
Decrease.....		6,102
Average number enrolled.....	82,402	
Decrease.....		4,385
Average number in daily attendance.....	50,315	
Decrease.....		6,046
Number of teachers (including assistants), men.	1,235	
" " " women.	1,121	
	2,356	
Increase.....		30
Average number of months schools were open..	8 20-30	
Decrease.....		2-30
Amount received from State as School Tax, Free School Fund and Academic Donation.....	$338,134 44	
Increase.....		$7,402 19
Amount received from appropriation to colored schools.....		$79,441 56
Same as last year.		
Amount received from county tax.....	$389,240 75	
Increase.....		$34,188 24
Amount paid for teachers' salaries.....	$655,347 92	
Increase.....		$23,805 11
Amount paid for building, repairing and furnishing school-houses.....	$88,568 71	
Increase.....		$3,893 21
Amount paid for books and stationery.....	$44,861 89	
Decrease.....		$7,057 82
Amount paid for supervision and office expenses	$40,138 08	
Increase.....		$5,152 03

Amount paid for incidental expenses, including fuel and rent	$46,350 95	
Increase		$7,023 40
Amount paid for interest	$4,273 62	
Increase		$31 17
Amount paid for miscellaneous expenses	$7,248 25	
Decrease		$1,235 06
Amount of indebtedness paid	$35,870 30	
Increase		$10,669 47
Total expenditure for Public School purposes	$922,659 72	
Increase		$42,281 51

The items of expenditure which show an increase are:

Teachers' salaries	$23,805 11	
Building, repairs, &c	3,893 21	
Supervision and office expenses	5,152 03	
Fuel, rent and incidental expenses	7,023 40	
Interest	31 17	
Indebtedness paid	10,669 47	
Total increase		$50,574 39

The items of expenditure which show a decrease are:

Books and stationery	$7,057 82	
Miscellaneous expenses	1,235 06	
Total decrease		$8,292 88
Showing a net increase of		$42,281 51

DECREASE OF ATTENDANCE.

The most noticeable point in the foregoing summary is the falling off in the enrollment and attendance of pupils in the county schools. This was caused by the exceptionally long and severe winter, and by an unusual amount of sickness in some counties in the early summer. Considering the number of causes which are continually operating to keep the young out of the school-house—bad weather, personal sickness, sickness in the family, the need of help in the household, or on the farm—it seems to be exceedingly desirable that the schools should be kept open ten months in the year, as the law allows, in order that those who are prevented from attending at one season may have an opportunity of attending at another. "They shall cause instruction to be given ten months in the year, if possible." This has been the law since 1868, and though considerable progress has been made towards a longer school year, there are fourteen counties that came short of the ten months last year. It is not to be supposed that the schools can be equally well attended during each of the ten months. But a larger aggregate of pupils may naturally be expected when the schools are open four terms than when open only three.

The Winter months belong especially to the larger boys. In April, May and June the schools should be kept open for the benefit of the younger children and girls who cannot travel long distances over the rough roads of winter. It is only when the schools are kept open from the beginning of September to the end of June, that an opportunity will be given for *all* the children to receive instruction during some part of the year. It may be thought a hardship that schools should be kept open at the public expense in the months of September, May and June, when perhaps not more than thirty per cent. of the children are able to attend them. But it would be a still greater hardship if this thirty per cent. should, by closing the school during these months, be deprived of the means of education. The great objection is the expense, but the fourth term would not necessarily cost as much as each

of the other three. Of the nine hundred teachers thrown out of employment on the fifteenth of April every year, a few go to work on farms, a few open subscription schools, but the majority have nothing to do. A small addition to their annual salaries would secure the services of most of them for the entire school year of ten months. The school law seems to recognize the fact that schools cannot be always full. It is only when the average attendance falls below ten *for two successive terms*, that a public school can be legally closed on the ground of bad attendance. Another argument in favor of a ten months' school is that it enables the counties to secure better teachers by giving them permanent employment.

ILLITERACY.

The Census Bureau Bulletin, No. 268, has published the startling fact that there are in Maryland 134,488 persons over ten years of age who are unable to read and write. In view of the fact that we have free public schools scattered all over the State, and that most of these schools have been in good working order for ten, and many for fifteen years, the existence of so much illiteracy demands our attention and calls for some vigorous action. It does not mend matters to say that this illiteracy exists principally among the colored population. They need education as much as white people, for the vote of a colored man counts as much as that of a white man. The people of Maryland of every party sincerely desire to educate them so that they may become intelligent and useful citizens, for they regard ignorance as a misfortune no less to the colored man than to the white.

The School Law of 1865, which first made free public education possible in this State, did nothing for the colored people, except to set apart for their benefit the proceeds of any taxes they might have paid for school purposes. There is no record of any Colored schools having been organized under this law. In 1872 the Legislature appropriated the sum of $50,000 a year to the education of Colored children, and required the County School Commissioners to open one or more

Colored schools in each election district, and to keep them open as many months in the year as the White schools, and to furnish instruction in the same branches. In 1874 this appropriation was increased to $100,000.* Schools were opened wherever suitable rooms could be obtained, but the money was not sufficient both to build houses and pay current expenses. Of late years some good houses have been built, and the prospects of the schools are encouraging, but very much has yet to be done before the army of illiterates is driven entirely off the field.

CONGRESSIONAL AID.

Nothing effectual can be done without more money, and the people of Maryland, however willing, do not feel able to increase their taxes. Can we get help from Congress?

The Honorable W. H. Blair, of New Hampshire, has introduced into the Senate of the United States a Bill which proposes to distribute, in the course of ten years, $105,000,000 among the several States in proportion to the number of illiterates in each, as ascertained by the late census, this sum to be applied by the State authorities to the support of common school education. A joint resolution endorsing this Bill was introduced into the Senate of Virginia, and passed with but one dissenting voice. The resolution requests the Governor of Virginia to take steps to have this important subject brought before the attention of the several State Legislatures. The State Board does not wish to discuss either the principles or details of the measure at this time, but hopes that when the question is brought before the General Assembly it will receive the careful consideration which its importance demands.†

---

* The amount expended on Colored schools last year was $151,544.53, or about $6 per capita of enrolled scholars. The excess over $100,000 was raised by city and county taxation.

†SYNOPSIS OF MR. BLAIR'S BILL.

Section 1 appropriates one hundred and five millions of dollars to secure the benefits of common school education to all the children living in the United States, to be paid as follows: Ffteen millions the first year; fourteen millions the second; thirteen millions the third year, and so on for ten years and no longer.

Section 2 names the branches that shall be taught—the art of reading, writing and speaking the English language, arithmetic, geography, history of the United

DISTRIBUTION OF THE ILLITERATES.

It will be seen that the proportion of illiterates in the several counties varies, generally (but not *exactly*, on account of disturbing circumstances), as the proportion of the colored population to the white population.

The table on the next page shows the percentage of colored people and the percentage of illiterates in each county, with the rank of the county in each class.

States, and such other branches of useful knowledge as may be taught under local laws, which instruction shall be free to all without distinction of race, provided, however, that there may be separate schools for children of different races.

Section 3 provides that the annual appropriation shall be divided among the several States in proportion to the number of illiterates; that is, of persons over ten years of age who cannot read and write.

Section 4 enacts that the money shall be expended in each State by the concurrent action (each having a negative on the other) of the Secretary of the Interior and the State Superintendent of Public Schools; in case of failure to agree, the money to be returned to the Treasury and added to the general appropriation for the next year.

Section 5 enacts that the money shall be so expended as to provide for the equalization of school privileges to all the children of the several States and Territories; existing public schools may be aided or new ones may be established.

Section 6 allows one-tenth of the money in each State to be used for the education of teachers, in Normal Schools, temporary Training Schools, Teachers' Institutes.

Section 7 recites that the design of this Act is not to establish an independent system of schools, but to aid for the time being in the development and maintenance of the school systems established by local power; and provides that all States availing themselves of the provisions of this Bill must expend annually for the support of free schools for the first five years, a sum equal to one-third of what they receive from the general government under this Bill; and for the next five years, a sum equal to the whole amount so received annually. If such expenditure is not made in any State, the Secretary of the Interior is authorized to expend the allotment at his own discretion within such State, for the support of existing schools or the establishment of new ones.

Section 8 provides that no part of this money shall be applied to the building of school houses, except in extraordinary cases, and then limited to five per cent. of the allotment.

Section 9 requires the President of the United States, by and with the advice and consent of the Senate, to appoint a Commissioner of Common Schools in each State and Territory, who shall be a citizen thereof and reside therein, and who shall be especially charged with all the details of the execution of this Act within his jurisdiction, and in co-operation with the State authorities. His salary is to be from three to five thousand dollars. He is to report to the Secretary of the Interior and to devote himself to the promotion of the general interests of public education in his State.

Section 10 provides that any State in which the number of illiterates does not exceed five per centum of the whole population, may expend the money allotted to it under this Act for the promotion of Common School education in its own borders or elsewhere, or may return the money to the general fund.

	Colored population as a percentage of the whole population.	Illiterates as a percentage of the whole population.	Rank as to number of colored population.	Rank as to number of illiterates.
Charles	58	34	1	1
Calvert	56	29	2	5
St. Mary's	51	30	3	3
Anne Arundel	48	28	4	6
Prince George	47	28	5	7
Kent	41	20	6	11
Somerset	39	30	7	4
Talbot	38	22	8	10
Queen Anne	37	19	9	13
Dorchester	36	28	10	8
Montgomery	36	17	11	14
Worcester	35	31	12	2
Caroline	32	19	13	12
Wicomico	28	23	14	9
Howard	28	15	15	15
Harford	23	11	16	17
Baltimore City	16	8	17	22
Cecil	16	8	18	23
Frederick	14	12	19	16
Baltimore	12	10	20	20
Washington	8	10	21	21
Carroll	7	7	22	24
Allegany	4	11	23	19
Garrett	1	11	24	18

An analysis of this table will disclose some interesting facts. We assume as a provisional hypothesis that, other things being equal, the proportion of illiterates will vary directly with the proportion of the colored population; if it does not there must be some disturbing influence. The counties of Charles, St. Mary's, Howard, Washington and Baltimore, having the same rank in both classes, conform exactly to the hypothesis. The counties of Anne Arundel, Prince George, Talbot, Dorchester, Caroline, Harford and Carroll, coming within one or two places of the rank assigned them by theory, may also be reckoned as practically confirming the hypothesis. The city of Baltimore ranks five grades better than our theory will allow. This may fairly be ascribed to the excellent system of city schools which has now

been in existence half a century. Cecil and Kent are also five grades better than theory would lead us to expect. These counties levy a county school tax amounting to about four dollars per capita of the actual school population. Wicomico is five degrees worse than we should expect. Wicomico levies a county school tax of one dollar and twenty-five cents per capita of school population. Allegany is four (4) steps higher in the scale of ignorance than the place theory would assign, although she levies a county school tax of over four dollars per capita of school-going children. But this is reasonably explained by the disturbing element of a large foreign population, amounting to more than fourteen per cent of the whole. Queen Anne's is four places ahead; Queen Anne's levies a county school tax of three dollars per capita of school population. Somerset is three places in the rear; Somerset levies a county school tax of about seventy-five cents per capita of school population. Garrett is six steps in the rear; but Garrett is a new county, embracing a large territory with a sparse population, and so poor that, with an average county school tax of twenty-six cents on the hundred dollars, the schools can be kept open, on an average, only six months in the year. Calvert and Montgomery are each three degrees in advance of the theoretical position. It seems reasonable that Charles county, having the largest proportion of colored population, (fifty-eight per cent.) should also have the greatest proportion of illiterates (thirty-five per cent.); but why Worcester, which stands twelfth in the rank of colored population, should stand next to Charles in illiteracy, is at present inexplicable.

The geographical distribution of the illiterates is also worthy of attention. The smallest proportion (varying from seven to twelve per cent.) is found in the northern tier of counties, taking in the whole line from Garrett to Cecil. The greatest proportion, ranging from twenty-eight to thirty-four per cent., is found in the southern counties, Prince George, Anne Arundel, Calvert, Charles and St. Mary's, on the Western shore; and Dorchester, Somerset and Worcester, on the Eastern shore. In the remaining counties, Howard

and Montgomery, on the Western shore, and Kent, Caroline, Queen Anne's, Talbot and Wicomico, on the Eastern shore, the illiteracy ranges from fifteen to twenty-three per cent.

ILLITERACY IN BALTIMORE.

If the greatest proportion of the illiteracy reported by the Census Bureau is to be found among the colored population, it must not be forgotten that there is another focus of ignorance to be found in the lowest stratum of the population, white and colored, of the city of Baltimore. A large city is the basin into which the moral drainage of the surrounding country flows by natural law. The influx cannot be prevented, but the bad effect may be and should be mitigated. In the absence of a dense population and its concomitant evils, the ordinary operations of our Public School system may be trusted to relieve us in the course of time from the incubus of gross ignorance. But ordinary operations are too slow for a large city. According to the Report of the Board of Public School Commissioners, there were, in the year 1878, 40,083 children between the ages of six and twenty-one not in attendance upon any school. Assuming that one-third of this number had finished their school education before arriving at the age of twenty-one, there were still 26,722 illiterates remaining, and this number had increased to 28,433 in 1880, according to the census of that year. The Commissioners very truly say in their report dated January 1, 1879: "This census shows that there are many children in our city who are growing up in ignorance and idleness, and who will necessarily become a curse to the community in which they live. It suggests a subject for the serious consideration of those interested in the future welfare of a class who may exercise an important and controlling influence in our city, and that they should devise some means for compelling every child to receive the benefit of public or private instruction." The laissez faire system will not bring these children under instruction. If not dealt with in time, they will grow up ignorant, idle, and many of them vicious. One-half of them will in a few years be voters, and will sell their votes to the highest

bidders. There will be a riot, and ten thousand strong arms will array themselves against law and order. The police system of the city costs about as much as the school system today. In a few years its cost may be doubled. Prevention is better than cure. The mere ability to read and write will not of itself prevent crime. But the habits of order, regularity, obedience, self-restraint, courtesy and respect for the rights of others, which may be and ought to be acquired at school, have a strong tendency to fit young people to be good and useful members of society. Something should be done, ere it is too late, to reclaim these 28,000 neglected children. Mere legislation will accomplish nothing; but legislation backed by money, and supported by the personal efforts of philanthropic men and benevolent women, may accomplish much. There was a time when we had no school for the deaf and dumb, no school for the blind, no House of Refuge for the incorrigible; and a succeeding generation will wonder that we could do so long without schools for poor and neglected children, the waifs and strays of the city, the victims of the neglect, the misfortunes or the vices of their parents.

GARRETT COUNTY.

Among the provisions of the School Law of 1872 there is a clause which requires every county to keep its schools open for three terms (or seven and a half months) every year, under the penalty of losing one-fourth of the annual distribution of the school tax. At that time it was easily within the power of all the counties to comply with this requisition, because those counties that were considered less able than the others were peculiarly favored by the principle of distribution prescribed by law. None but white schools were in operation, but the State School tax was apportioned according to the total population, white and colored. This was a great help to the counties having a large colored population; and was in accordance with one of the fundamental principles of our school system—that ignorance being not a local evil merely, but an injury to the whole body politic, the property of the State may therefore be rightfully used for the protection of

the State, and consequently it is the interest as well as the duty of the wealthier sections to aid the poorer against the common enemy.

In 1872 the new county of Garrett was organized; but with its large territory, sparse population and small taxable basis, it was unable to keep the schools open for three terms in the year, even when the county school tax was raised to thirty cents in the hundred dollars. Consequently, the county lost one-fourth of its annual apportionment of the State School tax. This was refunded by the General Assembly in 1880; but the county needs still more aid, and, under the law as it stands, none can be given. If the population of Garrett were half white and half colored, the amount of State School tax available for the support of white schools would be just double what it now is.

THE ADMINISTRATION OF THE SYSTEM.

It should not excite any surprise if the administration of the Public Schools provoked criticisms and led to disputes, quarrels and suits at law. When we consider the amount of money raised and expended—more than a million and a-half of dollars among less than a million of people; the magnitude and importance of the interests involved—the well-being of our children; the number of agents to whom these interests are entrusted—three thousand teachers, seven thousand school trustees, twenty-five separate boards of management, and twenty-six superintendents, under various titles; when we reflect that some part of this vast machine comes in contact almost every day with nearly every household in the State, and with the most sensitive part of the household; when we add to this that the public school touches a man on every side—his pocket, his conscience, his political preferences, his religious convictions, his family affections, his public duties; and, when finally we take into account that every man considers himself an expert in school matters, and is always ready to express and defend his opinion, it would be very strange indeed if there should be no indications of dissatisfaction. Yet the fact is that there has been very little

fault-finding. The machinery of the school system has worked for thirteen years with remarkable smoothness. There has been occasional friction, some sparks have been struck out, but there has been no damage done that did not admit of easy and rapid repair. Much of the success of the system may be traced to the admirable adaptation of the machinery to the work to be done, and to the checks and balances which equalize and harmonize the movements of the various parts.

In the first place the local trustees nominate the teacher, but cannot appoint him nor fix his salary. They can recommend the making of repairs on school-houses, but cannot order them to be made. It requires the action of the county school board to give effect to the wishes of the local trustees in all important matters. If there is a disagreement among teachers, patrons and local trustees, it may be referred to the County School Board for settlement. If it is not settled there, there is an appeal to the State Board. The number of appeals to the State Board has been remarkably few; but the fact that such an appeal can be made, and that in no ordinary case is any resort to the courts of law necessary, has largely tended to promote peace and harmony. The powers of the State Board are ample. The right to construe and explain the school law and settle disputes secures to a great extent uniformity in its execution and prevents petty disputations. The authority to enact a code of By-Laws for the guidance of teachers and County School Boards gives elasticity to the management, and makes a biennial reconstruction by the legislature entirely unnecessary. The majority of the State Board are necessarily experts in school management; they know practically the diseases and the appropriate remedies. The power which they possess, to suspend or dismiss an incompetent teacher or examiner, has never been exercised as yet; because the Board has not been fully satisfied that there was any necessity to do so. The Examiner, or Secretary, is appointed by the County School Board, but cannot be dismissed by them before the expiration of the term for which he was appointed. The power of dismissal is lodged with the State Board. Thus the powers of local Trustees, the County

School Boards and the State Board of Education mutually check, supplement and support one another.

LEGAL DECISIONS.

Very few school questions come before the law courts for adjudication. The most interesting case that has been decided by the Court of Appeals is here quoted in full, because it discusses with great force and clearness two very important questions:—The right of a County School Board to establish a High School, and the quasi-judicial powers of the State Board of Education.

"*W. Wyatt Wiley, et. al., Trustees, versus The Board of County School Commissioners of Allegany County.* Injunction to restrain a Board of County School Commissioners from converting a public school house, used for district primary school purposes, to the use and purposes of a County High School—Construction of the Acts of 1872, Chap. 377; and of 1874, Chap. 463—Visitatorial powers of the State Board of Education.

"Appeal from the Circuit Court for Allegany County in Equity.

"Case is stated in the opinion of the Court.

"The cause was submitted to Bartol, C. J. Bowie, Miller, Alvey, and Irving J.

"Alvey J. delivered the opinion of the Court. The complainants filed their bill as citizens and taxpayers and also as Trustees of a District School in the city of Cumberland, against the Board of County School Commissioners for Allegany county, praying an injunction to restrain the defendants from converting a Public School-house, which was at the time of the filing of the bill used for District Primary School purposes, under the supervision of the complainants, as Trustees, to the use and purposes of a High School.

"I. In their capacity as Taxpayers the complainants ask that the defendants be restrained, upon the ground that the latter are about proceeding to establish a High School in the city of Cumberland, when in fact there has been no presentation or donation by any Election District or Districts of a suitable

building for the use and purposes of such a school, as contemplated by sub-chapter 17, Section I, of the Act of 1872, Chapter 377; and that without such presentation of a suitable building for the purpose, the proposed act of the Board of County School Commissioners would be wholly without the warrant of law, and a gross misapplication of the Public School Fund under their control. But it is manifest that this ground of the complainants' application is based upon a misconception of what is the true construction of the sub-chapter 17, of the Act of 1872, Chapter 377, Title, High Schools. By the first section of this sub-chapter it is made the duty of the Board of County School Commissioners, whenever any Election District or any contiguous Election Districts shall present a building for a High School, in said District or Districts, to the Board of County School Commissioners, to accept the same if, in their judgment, there be a necessity therefor, "and thereafter provide for maintenance of a High School in said District or Districts, and the salaries of teachers out of the general school fund." And by the second Section of the same sub-chapter it is provided that if the High School be established by a District or Districts, the Board of County School Commissioners shall appoint three persons, who shall constitute a Board of High School Commissioners, whose duty, &c.; 'but High Schools established by the county shall be under the direct control of the Board of County School Commissioners.' From these provisions of the Statute it is plain there are two classes of High Schools contemplated by the law; one the District High School and the other the County High School; and that the right and power to establish the latter is dependent on no such conditions as the former. It is within the power and discretion of the Board of County School Commissioners to establish the County High School whether the building therefor be donated or not; but their power to establish the District High School is made dependent upon the donation of the building by the Election District or Districts for which such High School shall be established. And the Board of County School Commissioners having the power to establish

a County High School irrespective of the donation of the school-house, the question, whether the discretion of the Board has been or will be judiciously exercised or not in respect to such school, is a subject with which a Court of Equity has nothing to do. If the proposed act in establishing the High School be within the scope of the authority delegated, as it clearly is, it is not competent to a Court of Equity to restrain the exercise of the discretion of the Commissioners given by the Statute, unless it be clearly shown that the power has been, or is about to be corruptly and fraudulently used. It is true, a public corporation, such as the Board of County School Commissioners, incorporated for a great public purpose, and charged with the duty of applying and properly disbursing large amounts of public funds, for the accomplishment of particular objects, is required to act strictly within the authority delegated, and to apply the funds at its disposal for the purposes expressed, and for none other whatever. And if there be an attempt to apply the funds to objects not embraced within the power granted, or to objects within the power, but in total disregard of essential conditions prescribed by the Statute to make it lawful to appropriate the funds, a Court of Equity will interfere to restrain such action. Trewin vs. Lewis, 4 M. & Cr. 249, 254; Attorney-General vs. Compton, 1 Y. & Col., C. C. 477; Attorney-General vs. Guardians of Poor of Southampton, 17 Sim., 6; Attorney-General vs. Mayor of Wigan, Kay, 268, S. C., 5 D. M. and G. 54. But so long as such body of public functionaries confine themselves within the limits of the powers delegated, the Court will not interfere with the exercise of their discretionary powers, or undertake to determine the question whether the act complained of be wise or unwise, good or bad. When the Legislature has confided the power of determining as to the wisdom and expediency of an act authorized to be done, to a Board of public functionaries, with them the decision of the question must rest. And that is the case here. The Board of County School Commissioners being clothed with power, in their discretion, to establish a

County High School, their determination upon the subject can not be reversed or controlled by a Court of Equity.

"II. The complainants failing to show sufficient ground for the injunction in their character of taxpayers, the next inquiry is, whether they have shown any sufficient ground in their official character as Trustees, holding their office by appointment of the Board of County School Commissioners. They allege in their Bill that they are Trustees of the District School about to be disturbed, and that the school-house proposed to be converted and appropriated to the use of the High School intended to be established is occupied by the District School under their charge and supervision, and that the establishment of the High School will have the effect of breaking up the District School as now located, to the great inconvenience and detriment of the pupils attending it, and will, of course, deprive the complainants as Trustees of their power and control over such District School-house. Now, however much this may be the subject of regret, it is quite clear these allegations furnish no ground for the interposition of a Court of Equity. The statutes under which the present school system of the State is organized have provided the mode and the agency for settling all such questions as this without resort to the courts. By sub-chapter 3, section 4, of the Act of 1872, chapter 377, as amended by the Act of 1874, chapter 463, the State Board of Education are charged with the duty of seeing that the provisions of the statutes are faithfully carried into effect. They are required to make By-Laws for the administration of the Public School system, not at variance with the law; they have power to suspend or remove Examiners or Teachers; and then it is provided that "they shall explain the true intent and meaning of the law, and they shall decide, without expense to the parties concerned, *all controversies and disputes that may arise under it.*" This is a visitatorial power of the most comprehensive character; and it has been settled ever since the great case of *Phillips vs. Bury* (*Lord Raym*, 5, 2 *Duer and East*, 346) that such power is, in its nature, summary and exclusive. In delivering the judgment in the case of *St. John's College vs. Toddington*, 1 *Burns*,

159, 200, Lord Mansfield said that "the visitatorial power, if properly exercised, without expense or delay, is useful and convenient to colleges; and it is now settled and established that the jurisdiction of a Visitor is summary and without appeal from it." And it may be added, that such power is not more useful and convenient to colleges than to other well-organized educational establishments. If every dispute or contention among those entrusted with the administration of the system, or between the functionaries and the patrons or pupils of a school, offered an occasion for resort to the courts for settlement, the working of a system would not only be greatly embarrassed and obstructed, but such contention before the courts would necessarily be attended with great costs and delay, and likely generate such intestine heats and divisions as would, in a great degree, counteract the beneficent purposes of the law. It is to obviate these consequences that the visitatorial power is conferred; and whenever that power exists, and is comprehensive enough to deal with the questions involved in an existing controversy, as is the case here, Courts of Equity decline all interference, and leave the parties to abide the summary decision of those clothed with the visitatorial authority. Cases upon this subject are quite numerous, but it is only necessary to refer to a few of them in support of the principles here stated. Attorney General *vs.* Middleton, 2 Ves. Sen. 328; Berkhamstead Free School, ex parte, 2 Ves. and B. 134; Attorney General *vs.* Smythies, 2 M. and Cr. 139; Magdalen College Case, 10 Beav. 402; Whiston *vs.* Dean and Chapter of Rochester, 7 Hare 532, 559. Finding no ground whatever in the allegations of the Bill to warrant the granting of an injunction, and that being the only relief sought, we shall affirm the order appealed from and dismiss the Bill. Order affirmed and Bill dismissed, with costs to appellees. Decided June 17, 1879."

LIFE CERTIFICATES.

It is considered desirable that permanent teachers of established reputation should be relieved from the necessity of passing an examination every three years. For this purpose

27973M369

the State Board is empowered to grant certificates, valid during good behavior, to teachers who have fulfilled the following conditions and give due evidence thereof:

1. They must hold a valid first grade certificate, or the diploma of a respectable college or of a State Normal School.

2. They must have taught for seven years, five of these in the State of Maryland.

3. They must pass (if required) an examination before the State Board in the branches taught in the public schools, and in the methods of instruction and school management.

Life Certificates have been issued during the year to the following persons: Samuel J. Spalding, Carroll county; Alfred J. Brown, Harford county; Charles E. Markland and Miss Rachel Prill, Baltimore county; John Landers and E. L. Boblitz, Frederick county; J. W. S. Cochrane, Allegany county.

STATE NORMAL SCHOOL.

The State Board of Education are ex-officio Trustees of the State Normal School; they appoint the teachers, fix their salaries, arrange the programme of instruction, and have full control of the school in every respect, under the provisions of the School Law. This school is the keystone of the arch of the Public School system of the State. It gives strength to and is itself strengthened by all the other parts of the structure. It is not an "excrescence," nor a useless ornament, but a vital necessity. Wherever, in our days, men want to improve their schools, they begin by trying to improve the teachers, and the best agent yet discovered for the improvement of teachers is the Normal School. The Trustees of the Peabody Fund have wisely determined to devote *all* their funds, in future, to the improvement of teachers by means of Normal Schools and Normal Institutes. The Governor of Virginia, in his late message, calls on the Legislature to provide a Normal School for its Colored Teachers. All over the civilized world, in England, France and Germany as well as in the United States, it is recognized as a self-evident proposition that better schools can come only from better teachers, and that such teachers are to be had by training rather than by accident.

Nothing can be more incorrect than the assumption that the State Normal School of Maryland was merely one of the sequelæ of the Constitution of 1864. On the contrary, public opinion had, for many years previously, loudly and persistently declared that the establishment of such a school was an imperative necessity.*

Continued success has attended the school during the past year. The statistics will be found in Table I. Every seat has been filled. Every county has had its representatives. Every graduate has found employment. So great, indeed, has been the demand for teachers, even partly trained, that some students have been allowed to withdraw before completing the course, in order to take charge of schools where such teachers were much needed. We learn from the Census Bulletin, No. 268, that the number of active teachers in the State who have received Normal training is 424.

The Normal School for the Education of Colored Teachers is also doing good work. The number of pupils is larger than it was last year; it enjoys the confidence of the colored people, and well deserves the support of the State. The course of instruction is strictly confined to the branches neces-

---

*Thirty years ago the Board of Commissioners of Public Schools in their annual report to the Mayor and City Council, wrote as follows: "Normal Schools have been established in several of the States, and in some of them they have been in successful operation for a long time. The inhabitants of those States are now reaping the benefits of having their children educated by well-trained Teachers. That a Department should be organized in connexion with our System of Instruction for the special preparation of Teachers, is scarcely any longer a subject for argument. The profession of teaching is a responsible and laborious one, and should receive such aids as will furnish those who are about to engage in it with the means of gaining experience to qualify themselves for their duties. For the elevation of the profession of teaching to the rank it should occupy, a Seminary is required, to which all might resort who desire to perform the duty of teacher worthily. And we trust that when the demand shall be made upon your Honorable Body to aid in the enterprise, you will make liberal provision for that object."

In their Report for 1852 the Board (Dr. Jno. F. Monmonier, President), say: "The time has arrived when the interests of Education in this city require the establishment of a Normal School, in which persons not connected with our schools, desiring to become Teachers, may have an opportunity of preparing themselves for that calling."

In the Report for 1854, page 49 (Wm. Geo. Baker, President), we read: "Our system of public instruction does not at present include a Normal School. In the absence of this feature, as a system, it is imperfect. Experience has satisfactorily shown that the Normal School is a matter of necessity in every complete and efficient plan of Common School Education. The preparation of the teacher for the important duties assigned him, in the instruction and management of the school,

sary to be taught in the primary schools. There are six teachers and 431 pupils.

The other means authorized by law for the improvement of teachers—Teachers' Institutes, District, County and State Teachers' Associations—have been largely employed during the year, with the promise of the best results to the State and to the counties in which such meetings have been held. The small salary which is paid to teachers in some counties has operated as a reason for not calling the teachers together for professional improvement as often as would otherwise be desirable.

HIGHER EDUCATION.

The statistics of Colleges and Academies receiving donations from the State will be found in Tables I and K. It has been the policy of the State from the earliest times to aid in the support of higher education; but this support has been so irregular and so uncertain that it may be questioned whether in the long run the State aid proved to be more of a benefit than an injury. Two years ago St. John's College was receiving $25,000 a year from the State. Last year it received

---

seems to have become as essential as that of the mechanic, the tradesman and the professional man, for their several avocations. And this preparation should, if it be possible, be effected in the district of country in which the supply of teachers is desired. * * * The Normal School is now the most prominent feature in the most successful systems of Public Education pursued in our country."

In 1855 (Nathan Covington Brooks, President), page 17, the Report says: "The crowning excellence of any system of public school education is the instruction and direct training of teachers for the great work upon which they are to be employed. Mere scholastic attainments will not suffice for them; professional knowledge must be superadded. The Normal School, which is specially intended to prepare teachers for their responsible vocation, is an indispensable requisite to the perfection of any system of public instruction." * * * *

The Board in its Report for 1856, page 40 (Jno. R. Kelso, President), says: "Progress in this department will be but slow until we connect with our system a Normal School in which the material shall be furnished of a thorough education in all that is necessary to qualify the teachers of our schools for the performance of the arduous and responsible duties of their profession. The Board anticipates towards the establishment of a thoroughly organized Normal School. There is scarcely a system of public instruction, besides our own, in the country, without its Normal Schools. Entire success is nowhere expected without the aid of such an institution. It is high time that we had moved effectively in this department of our system, and were continually receiving, through its agency, a supply of well-trained and accomplished teachers for our schools."

In its Report for the year 1857 (Geo. N. Eaton, President), on page 16, the Board says: "The truth is, that our youth are not fully qualified for the arduous and re-

but about $8,000. What it will receive next year no man can tell. Two years ago the Agricultural College received $6,000 from the State; last year, $5 "and no more." Under such uncertainties no institution can be expected to flourish. To-day it "puts forth the tender leaves of hope; to-morrow blossoms; the third day comes a frost, a killing frost." If our higher home education is ever to amount to anything, it must either be left entirely to private patronage, or the support given by the State must be certain, permanent and sufficient. It cannot be denied that even when receiving the most assistance from the State some of these Institutions failed to come up to public expectation. But probably the expectations of the public were unreasonable. St. John's College was burdened with the expense of giving free rooms and boarding, as well as tuition and text-books to fifty-two students. Her best friends foretold that this undertaking must end disastrously, as it did. Perhaps the greatest error, so far as regards the general question of higher education, lay in ignoring the fact that a small State like Maryland cannot support four colleges, each of them giving instruction in the full range of a liberal education. If the work could be

---

sponsible duties of the teacher by the fact of having passed through the High Schools. They may have the intellectual requisites, so far as a knowledge of the branches to be taught is concerned, but they still need to be instructed in the art of teaching. It is to be hoped that our State will not allow itself to be much longer without the benefits of a general system of public instruction; and when that is the case, it will doubtless promptly resort to the establishment of a Normal School. In Maryland this feature of the system seems to be most especially required."

In their report for 1858, page 34, the Board again say: "No system of public instruction can be complete without the Normal School. Upon this point the Board is unanimous in sentiment. It is not proposed by any member of the Board to establish at this time a complete Normal School, such as are in operation in most of the States where there are educational systems. Such an institution would be more prosperous and useful under the patronage of the State, through the agency of which it should receive its proper support and direction. The object of the Board at present is merely to extend the recent arrangements in regard to Normal instruction, and provide for the exigency of the moment, until a proper Normal School may be established by the State Legislature. To be an efficient teacher requires much more than intellectual gifts and acquisitions. There are a few who seem to have a natural turn for the employment, but the great majority require to be instructed in the theory and practice of teaching, as well as warned of its high relations and serious responsibilities. This can adequately be accomplished only by special training and constant and devoted attention to the work itself. This is the province of the Normal School. The State should therefore take the matter in hand as one of the first of its duties. Instead of being the last considered, as the Normal School too often has been, it should be, in view of its importance, the first

divided among them, each taking a special sphere and confining itself strictly within that sphere, the chance of success would be greatly increased. The signs of the times seem to point in this direction. The Agricultural College is becoming a purely agricultural and mechanical school. It is said that St. John's is to be conducted hereafter as a polytechnic school. In these comparatively limited spheres they might achieve success, with or without State help. The right of the State to support higher education cannot be denied; but it becomes a question whether, under some circumstances, this right should be exercised. It may be laid down as a general principle that the State should not undertake to do anything which is as well done by private persons or corporations. Applying this principle to the present condition of affairs in Maryland, we find that the Johns Hopkins University covers the whole field of higher education, leaving only primary and secondary education to the State. It would follow that secondary education, in other words education above the grade of our primary and grammar schools, should be limited to those studies which are necessary to enable a student to enter the University, or which are not taught in the Univer-

care of the State in relation to public instruction. The workmen should be *prepared* for the work."

The Board further says, in its report for 1859, page 27: "It will be remembered that nearly all our teachers are the product of our own schools. The most of them are young graduates of the High Schools, who have never had any instruction in relation to teaching as an art. 'Mere knowledge of the rules of a study and of its modes of illustration is but the beginning of the work; how to impart knowledge; how to instruct and mould the young mind; how to awaken thought and engage the understanding; how to give relief from tiresome monotony and from the disgust that arises from meaningless tasks, and lead by attractive paths to the desired end; how to rouse the moral sense and render the pupil co-operative in all respects in the work; in short, how to educate and govern; these are the qualifications that are of necessity required to make the successful instructor, and these are the teacher's accomplishments which are to be acquired in a Normal School."

"The present classes, however, can hardly be considered as anything more than an experiment, or rather a temporary arrangement. It is of a satisfactory character to the Commissioners as far as it goes, but not by any means the institution we ought to have, when the State becomes fully sensible of the wants of its citizens in this respect. This is a proper subject for the consideration of the Legislature, and it should be attended to at its present session. In all the States where public education is properly encouraged, Normal Schools have been established, being recognized as an indispensable necessity.

"The qualifications of the teacher are not always possessed by those who are engaged in the practice of the profession. In the absence of the Normal School the necessary training is not secured, and years of actual experience become necessary

sity. Within this range there is ample work for all our High Schools, Academies and Colleges to do; and what would seem to be lost in extent would be gained in intensity. In this connection the Board would express a hope that so much aid will be extended by the Legislature to the Agricultural College as will enable it, with the assistance of the Congressional grant, to become what the Trustees wish it to be—the best of schools for the sons of farmers and mechanics, and others who wish to receive an industrial rather than a liberal education.

The whole question of secondary and higher education, in its relation to the State, is so complicated that the best way to deal with it would be to have a commission appointed by the Legislature to examine the subject in all its bearings, legal, economical and educational, and make such recommendations as their investigations may suggest, especially with regard to the best method of filling the gap between the District School and the University.

ASSOCIATION OF PUBLIC SCHOOL COMMISSIONERS.

The Public School Commissioners of the State meet regularly once a year, as an organized association, to take counsel

---

to insure success even to those whose scholastic attainments are fully sufficient for the purpose."

In 1860 the Report of the Board, page 27, says: "The indispensableness of Normal School teaching is recognized by all who are intelligent on the subject of education. A teacher is not necessarily qualified for the office by the ordinary processes of school instruction; and for our graduates of the High Schools some training in the art of teaching is undoubtedly requisite before the important trust of guiding other minds should be confided to them.

At present the provision for this want is altogether imperfect and inadequate for the required service. More extensive arrangements are requisite, and must at some future time be secured. It is not, however, the intention of the Commissioners to enlarge this department at the present time. They still entertain the hope, expressed in a former report, that the Legislature of the State will recognize the need of an institution for the supply of teachers for the several counties, and admit their duty in regard to it, so far as to establish a State Normal School, like those in most of the Commonwealths where education is duly estimated and fostered. No State in the Union is more in want of such an institution than our own. The Commissioners have heretofore made exertions, and they will still use their efforts and influence to obtain such a Normal School as is necessary for the State."

The Treasurer—Rev. Jno. N. McJilton—in his report of the same year, says: "There should be a State Normal School somewhere within our State lines; and there is no place better suited to the purpose than our city, where many more of the candidates for its opportunities reside, than any other part of the State. A full

together respecting educational matters. At their last meeting, on the 29th and 30th of November, the counties of Allegany, Baltimore, Caroline, Carroll, Cecil, Dorchester, Frederick, Garrett, Harford, Howard, Kent, Montgomery, Prince George's, Queen Anne's, Somerset, Talbot, Washington, Wicomico and Worcester were represented, and the city of Baltimore. There was a very free interchange of opinions about school affairs, and some warm discussions. The two following resolutions were among the most important of their transactions. They were unanimously adopted:

"*Resolved*, That, in the opinion of this Association, the whole proceeds of the Public School Tax of ten cents on the hundred dollars should be given, as formerly, to the support of the white schools; and that an appropriation of not less than a hundred thousand dollars should be made for the colored schools from the general Treasury, as formerly."

"*Resolved*, That, in the opinion of this Association, the Legislature should direct the Comptroller to pay to the Public Schools that portion of the Free School Fund, amounting to thirty-four thousand dollars, which was derived from the one-fifth revenue of the Washington Branch of the Baltimore and Ohio Railroad, and which was withheld in 1877, on the ground that the Baltimore and Ohio Railroad had not then paid it—said sum having been afterwards recovered from the road."

The following resolution was presented by Mr. A. Bowie Davis, of Montgomery county, and adopted after a protracted discussion:

---

supply of teachers for our service can never otherwise be obtained. Every day that we pass without the facilities that should be thus provided is a loss to our system. Were there a uniform system of public instruction in our State this necessity would be more apparent, and we should be obliged to meet it.

"The extension of our Normal School advantages is necessary in order to raise the standard of instruction now admitted and to systematize more thoroughly its operations."

The Board, again in 1861, on page 21 of its Report, says: "The Board has on several occasions spoken of the necessity of a Normal School for the purpose of preparing the teaching material for the whole State; and it is hoped that the Legislature will, ere long, vindicate its intelligence and public spirit in providing such an establishment in connection with a general system of instruction for the counties as shall be adapted to the wants and feelings of all our communities. With reference to a Normal School, the State has peculiar needs. It must have competent teachers educated within its limits, and especially prepared for its service. It cannot realize any other way all the benefits of a good system of public instruction."

In 1862, on page 29, the Report says: "The Board has, on several occasions, in its annual reports, touched upon the subject of Normal School instruction, being

"WHEREAS the Public School System of the State of Maryland contemplates the establishment, in each of the counties of the State, a High School for instruction in the higher branches of public school education;

"AND WHEREAS it has been found, thus far, inconvenient and impracticable to establish such High Schools;

"AND WHEREAS in most counties there exists one or more incorporated Academies, fostered and endowed by the State, and also many private schools, all of which are well furnished and qualified to impart such instruction as is contemplated to be taught in the High Schools under the Public School Law;

"AND WHEREAS it is desirable that the advantages and capabilities of these several Academies and private schools should be utilized and brought in harmony with the public primary schools of the State, which it is believed can be done to the mutual advantage of each and without detriment to either; therefore be it—

"*Resolved*, That this Association recommends to the several County Boards of Public School Commissioners as a subject worthy of study and inquiry, the practicability of effecting an arrangement between the Academies and Private Schools now in existence, or hereafter to be established, for the reception and instruction of boys and girls of genius and ambition for the acquisition of a higher grade of instruction than it is possible to give in the Public Schools as now established."

MARYLAND INSTITUTE SCHOOLS OF DESIGN.

These schools have attracted much notice during the past year, not more from the very large number of students who have availed themselves of the facilities furnished by the various classes than from the excellence of the work done by the students. The increase in the number of students made it necessary to appropriate the large hall to their use. A large number of casts and copies have been added to the apparatus. Classes have been formed in almost every depart-

---

desirous that the subject should be kept before the public until some adequate provision shall be made by the State to supply the deficiency in our system of Public Schools. The State Legislature is the proper authority by which such a school should be established. Committed to the principle of public education, it becomes as necessary for us to educate our own teachers as it is to educate the pupils they are to have in charge."

Again, in their Report of the year 1864, on page 26, the Board say: "This Board has not omitted for several successive years past to urge in its reports the cardinal importance of a thorough system of Normal School training for our teachers, and the time seems now to have arrived when this undeniable *desideratum* will be duly supplied. This State most especially needs an institution to enable it to train its own teachers, and its cannot be doubted that the proposed school law of the State will provide such a Normal School as will fully meet the desires and expectations of all friends of education."

ment of art studies; and the opportunities of instruction and improvement are not excelled within the United States. Those who wish to advance farther than the Maryland Institute can carry them must go to Europe.

SCHOOLS FOR THE DEAF AND DUMB AND THE BLIND.

The reports from the School for the Deaf and Dumb and the School for the Blind show them to be in a flourishing condition. But the same complaint that is made about our primary schools may be made about these Institutions. Though they are doing a great deal of good, and deserve credit and thanks, yet it cannot be said that *all* who need the training which they give are to be found within their walls. This is not the fault of the schools, and it is mentioned here only that those who know of any such unfortunates not properly cared for may urge their parents and guardians to send them to these schools, where they will meet with friends as well as instructors.

OFFICIAL VISITATIONS.

The Board, at their meeting in July, appointed a number of committees, each committee consisting of the Secretary and another member of the Board, with instructions to visit the several offices of the County School Boards, to examine into the methods of conducting business and keeping accounts and records. The purpose was mainly to ascertain whether it would not be advantageous to adopt a uniform system in all the counties. The final reports of these committees have not been received, as there are still four counties—Cecil, Anne Arundel, Calvert and St. Mary's—that have not been visited. The examinations that were made, however, were in most instances entirely satisfactory. In some offices the bookkeeping was more minute and elaborate than in others, but in all there seemed to be sufficient care taken to record with accuracy all official transactions, and to account for all moneys received and expended. In a few instances there was a lack of clerical neatness; and in some others a want of system, but the general impression left upon the minds of the visitors was that the work was in safe hands, and on the whole well done.

AMENDMENTS OF THE SCHOOL LAW.

In the last annual report of the Board some suggestions were made with regard to the amendment of the School Law, which may be briefly repeated here.

1. The only question of vital importance is with regard to the appointment of County School Commissioners. If the appointment by the Judges, as at present, is unconstitutional, another method must be adopted. If it is constitutional, some authoritative decision to that effect should be rendered, in order that no shadow of doubt may rest on this fundamental part of the system.

2. The County Examiner should either reside at the county seat, or be required to give two days' attendance every week at the office of the School Board.

3. School books should be changed not oftener than once in three years, and then only in the interval between the close of one school year and the opening of the next.

4. A census of the children of school age in the State should be taken at least once in two years.

5. In distributing the annual School Reports of the State Board, each County School Board should receive as many copies as there are schools in the county.

CHANGES IN THE BOARD.

It is with great regret that we record the death of our oldest colleague, Dr. John P. R. Gilliss, President of the Board of School Commissioners of Worcester county, who had been a member of the State Board of Education for nearly eight years. Dr. Gilliss was a staunch friend of public schools, a trustworthy counsellor, and a Christian gentleman of the old school. It is some alleviation of the grief that naturally follows the loss of one after another of our fellow-workers to know that since the organization of the Board, in 1872, perfect harmony has prevailed in all their deliberations. The Journal contains no record of a divided vote.

The Governor appointed the Rev. William Dale, of the same county, to fill the vacant place.

At the close of the year Mr. P. A. Witmer, who has been Secretary, Treasurer and Examiner of the School Board of Washington county since 1868, and a member of the State Board of Education since 1872, resigned his position on the State Board. Dr. E. H. Bartlett, of Garrett county, was appointed to fill the vacancy.

CONCLUSION.

In conclusion the Board would commend the public school system of the State to the fostering care of the General Assembly and to the friendly attention of the people of Maryland, believing that, while it is neither perfect in theory nor faultless in execution, it is admirably adapted to our present wants, and contains within itself the elements of growth and expansion which will fit it for our future necessities.

(Signed)

JAS. T. WILLIAMS,
WILLIAM DALE,
WM. H. HARLAN,
E. H. BARTLETT.

M. A. NEWELL, *Secretary.*

REPORTS

OF

THE SCHOOL COMMISSIONERS

OF

THE COUNTIES.

ALLEGANY COUNTY

SAMUEL SONNEBORN, *President.* J. W. S COCHRANE, *Secretary.*

Prof. M. A. Newell.

Dear Sir: We herewith transmit our annual report for the fiscal year ending September 30, 1881.

The enrollment of pupils during the last year was larger than that of the year previous, but the average attendance was smaller, owing to the unusually severe winter and epidemic diseases which broke out among the children of the mining region, for a time nearly depleting several of our larger schools.

Five school houses have been built during the year at a total cost of five thousand five hundred dollars.

The indebtedness of the Board at the close of the year was seven thousand dollars, which has since been paid.

Respectfully,

SAM'L. SONNEBORN, *President.*

J. W. S. Cochrane, *Secretary.*

ANNE ARUNDEL COUNTY.

RICHARD H. GREEN, *President.* WM. HARWOOD, *Secretary.*

ANNAPOLIS, November 1st, 1881.

Prof. M. A. Newell, Superintendent, &c.

SIR: The Commissioners of Schools of Anne Arundel County herewith transmit their annual report. We were compelled in the past year to close the schools for the summer term, being incumbered with an old debt which we had no means of discharging but by lessening our annual expenses. We have been led to expect that we shall not be again reduced to this necessity, but by means of adequate assistance from our county authorities will be enabled to support the schools through the four terms which the law prescribes. The public sentiment of the people will not endure that the *schools* for the education of our children shall be starved while money is so lavishly expended for much less worthy objects.

Our debt, which has been so much a hinderance to us, is now reduced to the sum of eight thousand seven hundred and ninety-seven dollars and fourteen cents ($8,797.14), and will be in a short time extinguished, when we shall be able to apply all our income to the expenses of the current year.

Notwithstanding the financial difficulties we have had to encounter, we think our schools are steadily progressing in improvement. To those who can remember what schools were half a century ago, the contrast of improved condition which they now present is most striking and most gratifying in the increased and increasing means of human elevation and human happiness which it exhibits. Of course our schools have not attained the highest standard of efficiency to which they may in time be raised. Solid improvement can only be attained by patient attention combined with the skill which

large experience bestows. The wild quackery so often attempted in the name of improving schools, by persons who have scarcely ever been in a school room since they were spanked in one for being bad boys, is a principal hinderance to their real improvement. Our school system was framed after much consideration of all its features and principles, by men with whom study and experience in the affairs of schools had been the business of their lives. Their work cannot be mended by men of inferior ability. It may be improved by a more large experience, availed of with the deliberate consideration and mature judgment with which it was at first framed, but in no other way.

One thing which seems to be necessary in our education is more practicalness. Besides mental and moral cultivation, everyone ought to acquire some useful art by which he may earn the means of providing for himself and for those who are dependent on him, and adding something to the general wealth of the community. In agricultural districts, this want is commonly supplied by the natural application of the children to the pursuits of their parents, which in most cases are also in after life to be their own. In the towns there is a large class for which some means of industrial education might work very great benefits. In Annapolis one of our public schools for colored girls has an industrial department added to it, which is supported by the charity of ladies of Annapolis and the United States Naval School, and which seems to be producing the happiest effects.

On this general subject of industrial education, we have some views we wish to have considered, and for that purpose, at a proper season, the attorney of our board, Mr. S. T. McCullough, with the secretary, will appear before the State Board.

RICHARD H. GREEN, *President.*

WM. HARWOOD, *Secretary.*

BALTIMORE COUNTY.

DANIEL JENIFER, *President.* THOMAS C. BRUFF, *Secretary.*

Professor M. A. Newell:

The annual report of the schools of Baltimore county is respectfully submitted. There is nothing of special interest to communicate.

DIFFERENT PUPILS.

The enrollment and average attendance show a slight falling off from last year. Epidemics (scarlet fever, whooping cough, diphtheria and measles) were prevalent throughout the county during a considerable portion of the year. Several schools, numbering over two hundred pupils on roll, had as few as ten present for several consecutive weeks, and a few of the small schools were closed until the panic had abated. The long and rigorous winter had also much to do with the irregular attendance. The grades, as reported by the teachers, show that the younger children were out of school from December to April.

EXPENSES.

The total cost of the schools for all purposes is $149,494.06, being an increase of $940.63 over last year. The aggregate of increase is $8,076.07, and of decrease $7,135.44. The principal items of the former are teachers' salaries, fuel and office expenses, and of the latter, books, building and furniture. Salaries alone are $5,215.37 in excess of last year. No more conclusive proof of the healthful condition of the schools is needed than this augmentation of salaries. Teachers are paid more or less, according to the grade of certificate they hold. Any decided increase in salary, therefore, means greater intellectual advancement among teachers.

The clerk of the Circuit Court needing more room for his department, the office of the School Board, by order of the County Commissioners, was transferred to the Masonic Temple. The cost of fitting up the rooms with cases, furniture, &c., was considerable, and is itemized under the head of office expenses.

SCHOOL HOUSES.

The following school houses have been built or enlarged during the year: A two-story brick building at Waverly, in the Ninth District. This school is the largest in the county, numbering nearly five hundred pupils. At Mount Washington, in the Third District, a stone house with three class rooms and basement. This building replaces an old house rented at $200 per year, and will accommodate one hundred and eighty pupils. At Loudon Park, in the First District, another story has been added, giving two additional class rooms. At Upperco, in the Fourth District, a one-room brick house, which replaces an old frame building no longer fit for occupancy. At Ashland, in the Eighth District, a one story stone building, with three class rooms, which will accommodate one hundred and fifty pupils. The school lot was donated to the Board by the Ashland Iron Company, and for ten years past the building occupied by the school has been given free of rent by the same company.

At Gardenville, in the Twelfth District, a two-story brick house, with four rooms, capable of accommodating two hundred pupils. It will consolidate Schools Nos. 11 and 15, now too near each other.

The demand for new houses is increasing, and it will take a number of years to do all that is required.

It is the policy of the Board to keep out of debt. The money over and above the actual running expenses of the schools each year will be applied to building, and the communities whose needs are greatest will have the preference. In several localities, unless something is done to replace the old shells denominated school houses, the schools must close, as these houses are not safe in stormy, nor habitable

during cold or inclement weather. There are at present on file in the office fifteen applications for new houses.

The houses for colored schools are mostly churches given free of rent for school purposes. They are all frame and in dilapidated condition. As they are used for both church and school purposes, they cannot be equipped with the furniture and apparatus necessary to the comfort and convenience of teachers and pupils. The only remedy is to build new houses to be used exclusively for school purposes. How the Board is to accomplish this, when it will take at least forty thousand dollars to give the white schools comfortable accommodations, is a problem to be solved. The colored schools might be closed during the summer term, when but few and small children attend, and the money thus saved converted into a building fund, out of which four or five houses might be built each year. If this plan were adopted, in a few years the houses could all be built and the colored people would then have comfortable school accommodations.

THE TEACHERS.

The teachers are, as a rule, working to make each particular school a success. They are giving more attention to the theory and practice of teaching regarded as a science. In this work they are availing themselves of such helps as Teachers' Associations, educational journals, normal classes and standard works on teaching. The time is not distant when all the teachers will be *professional teachers* in the sense of having studied their calling as the minister, lawyer or doctor is obliged to study his. As a result of this training, our schools will be conducted on uniform and systematic principles, and though the "royal road" may not be found, many of the thorns that now obstruct the pathway of learning will be removed.

The demand for scholarships at the State Normal School is so great that the Board cannot appoint more than half of those who apply. At present, there are over thirty pupils attending the school from this county. Appointments

are made after competitive examinations held in July of each year.

GRADING COUNTRY SCHOOLS.

The importance of grading these schools is no longer questioned, except by a few old fogies who know but little about the school system and care less for its benefits. The graded system is a labor-saving operation that diminishes the number of classes and economizes the time of both teacher and pupil. It systematizes the work, and a new teacher can continue the grades where his predecessor left off without loss of time. A pupil changing residence may enter a corresponding grade in another school without delay. Teachers all admit that the schools work better under this system than the old one of classification.

THOS. C. BRUFF,
Secretary, Treasurer and Examiner.

BALTIMORE COUNTY.

Summary of School Statistics for the year ending June 30, 1881.

CAROLINE COUNTY.

JOHN F. DAWSON, *President.* GEO. F. BEAVEN, *Secretary.*

Prof. M. A. Newell.

DEAR SIR: I will submit my report for the past year accompanied by only a few remarks.

Another member of our Board has been taken away from us by death, Mr. Henry Wilson, who did good service for four years, trusted and admired as a conscientiously honest man.

Our finances are in a wholesome condition, and we are confident of running our schools four terms this year.

The County Commissioners gave us a levy for next year's use of $8,000, $2,000 of this sum to be used for building, furnishing, &c.

Our new Board of School Commissioners, viz., Mr. John F. Dawson, of Greensborough; Mr. E. R. Goslin, of Federalsburg, and Dr. Enoch George, of Denton, are conducting the business entrusted to them with the most gratifying efficiency, having so ordered and systematized everything as to render the labors of the Secretary and Treasurer, though much accumulated and more burdensome, really pleasant.

Respectfully submitted,

GEO. F. BEAVEN.

CAROLINE COUNTY.

Summary of School Statistics for the year ending June 30, 1881.

	White.	Colored.		1880.	1881.
Number of School Houses—Frame, 65				65	65

CARROLL COUNTY.

WILLIAM REESE, *President.* JOSEPH M. NEWSON, *Secretary, &c.*

Prof. M. A. Newell,
Secretary of State Board of Education.

DEAR SIR: We herewith transmit to you the annual report of the Public Schools of Carroll County for the year ending September 30th, 1881. The tables herein embraced exhibit all the items of statistics separately, and little need be added to render them intelligible.

You may observe that the receipts and disbursements of this year appear to be considerably in excess of those of last year; but this is only in *appearance*, being the result of sums of money temporarily borrowed and paid back during the year.

It will scarcely escape notice that the items of "Incidental expenses of schools," "Rent," "Repairing," and "Furniture, black-boards and stoves," are each composed of *two* sums, one paid on the teachers' reports, and the other on separate bills presented, passed and paid, sometimes at other than *quarterly* meetings of the Board.

The available funds which come into the hands of our Treasurer are scarcely sufficient to enable the Board to provide for the fall, the winter and the spring terms of school, leaving no adequate provision for building school-houses, which are still much needed in various parts of the county; but the accompanying tables will show that *seventeen* of the schools were kept open, not only for *three*, but for *four* terms, the expenses of the *summer* term having, in part, been paid by subscriptions greatly varying in amount.

The "Pupils in average attendance" for the three terms would be about 3,451; but the highest average, 4,009, that of the winter term, is inserted in the table.

The omission to give the number of "Pupils over sixteen years of age" is to be attributed to the failure of the teachers, in some instances, to make full reports of that item, which is doubtless owing to the kind of blanks used in those cases.

The "Official school visits paid by Examiner" number only 162, which is a much less number than that reported last year; but the excessively inclement weather and the impassable condition of the roads for so long a time last winter will account for it.

Our views formerly expressed in relation to the utility and necessity of our admirable State Normal School, the disadvantages of *unpaid* school trustees as now provided for by law, the general dissatisfaction caused by the present mode of supplying text-books and requiring teachers to collect book-fees at different rates for their use, &c., &c., have undergone no change.

WILLIAM REESE, *President*.

JOSEPH M. NEWSON, *Secretary*, &c.

CARROLL COUNTY.

Summary of School Statistics for the year ending June 30, 1881.

	1881.	1880.
Number of School Houses—Frame, 32; Brick 63; Log, 18; Stone, 12.	125	125

Number of Pupils in Book-Keeping, 116; Algebra, 209; Philosophy, 279; Geometry, 38; Physiology, 195; Latin, 3.

School Houses Built or Enlarged During the Year.

No. of School.	District.	Brick or Frame.	Cost.
a 6, 7, 8	1	Brick.	*b* $ 608 96 *c* 1,835 50 *d* $2,444 46
1	2	Brick.	*e* 613 98
12	6	Brick.	110 51

a Nos. 6, 7 and 8 represent one brick house of 3 rooms recently finished, the dimensions of which are not yet reported. The corresponding sums in this table will show the whole expense of this new house.

b Unpaid within the year being reported. This balance, $608.96, must be carried into next year.

c Payments by checks, $1,800, and $35.50 realized from materials sold.

d Total cost of a three-room house for the Graded School at Taneytown.

e Not fully reported (two large rooms).

The items here given do not show the whole cost of the buildings referred to, but only the sums paid upon each respectively in the year here reported. The item in the statement, however ($2,444.46), represents the whole cost of the house for Nos 6, 7 and 8 for the Taneytown graded schools, on which a balance of $608.96 having been paid after the 30th of September must be carried into next year's account.

CECIL COUNTY.

F. S. EVERIST, *President.* JOHN SQUIER, *Secretary.*

Prof. M. A. Newell,
Secretary of State Board of Education.

DEAR SIR: In reporting to you the condition of the schools in our county, we have no special communication to make. The schools have been kept open for the full time of four terms during the past year. We think the teachers are improving in their conduct of their schools and are doing their work well.

We have built four new school houses during the past year, all complete with good furniture, and two others are now in the course of erection and will shortly be finished.

As to our opinion of the present school law and its working, you are already full informed. We have seen no reason to change the opinion expressed in the report of 1879. The necessity for any alteration should be very clear, as any change in the law will involve very serious changes in the administrations of the schools all over the State.

JOHN SQUIER, *Secretary.*

CECIL COUNTY.

CHARLES COUNTY.

GEO. M. LLOYD, *President.* A. W. NEALE, *Secretary.*

Cox Station, November 11th, 1881.

Prof. M. A. Newell.

Dear Sir: I have the honor to transmit herewith the annual report of Charles County Schools. I have but little to bring to your notice beyond what is contained in the statistics. The schools were not kept open the full number of terms (4) during the year; but having been closed for the month of January, when the weather was so severe and the walking so bad for our little ones that they could not have attended with much regularity, our loss in attendance was not so great as it would have been if we had closed for any other month in the year. The weak condition of our finances about that time was the primary cause of our closing; and as a considerable item was saved in the way of fuel, in addition to our saving on salaries, the wisdom of our Board in closing for January, when it was probable they would have been necessitated to close for some other month, was fully justified. We have built during the year three new school houses; one in the place of one lost by fire, one in the place of an old house that was no longer fit for use, and one to establish a new school in a locality that had long been without proper school facilities. We lost in December last another house by fire, being the second so lost within a period of three years. I have made inquiries among many of our old inhabitants and find that these two are the only ones remembered to have been lost by fire for the last thirty or forty years. We have built another house in the place of the one destroyed, and its cost will go in next year's expenditures. We

have had no unpleasant jars during the year, everything working harmoniously and smoothly with us.

I have but one thing to submit to your consideration and to that of the State Board, when they meet to consider the best means of promoting the effectiveness of our school system, and that is the irregularity of the attendance at school. I have endeavored, whenever opportunity offered, to impress upon parents, teachers and pupils the great importance of regular attendance, and this subject has been the constant burthen of my remarks in the schools, but all seems to little purpose. If in the wisdom of the honorable body, of which you are the executive, any by law could be contrived to meet the urgent need of some improvement in this particular, a great benefit would be conferred upon the educational interest of the State. The closing of any school that fails to make an average of six pupils, is perhaps as far as the State Board may be able to go; but a school may fail to make this average for one term, and make an average of twelve or fifteen for the next, and if closed for the failure, the patrons would complain most bitterly. Hoping our report may prove satisfactory to you in every particular,

I remain, very truly yours,

A. W. NEALE, *Secretary.*

CHARLES COUNTY.

Summary of School Statistics for the year ending June 30, 1881.

	White.	Colored.		1880.	1881.

FREDERICK COUNTY.

JAMES W. PEARRE, *President.* D. T. LAKIN, *Secretary.*

Prof. M. A. Newell,
Secretary of the State Board of Education.

DEAR SIR: Herewith is transmitted the annual report of the Public Schools in Frederick County for the fiscal year ending September 30th, 1881.

We believe our schools are growing both in efficiency and public favor. This is due mainly to two causes.

First, better qualifications of teachers. Second, more comfortable school houses and furniture.

The slight falling off in the enrollment, and heavy decrease in the average attendance, as compared with the previous year, are owing to the severity of the winter of 1880 and 1881.

By a special act of the legislature of 1880, the County Commissioners of Frederick County were authorized to levy and appropriate a sum, not to exceed $10,000 in any one year, for the purpose of building and furnishing *new school houses* under the supervision of the said Board of County Commissioners. This was construed by them as giving them the authority to build and furnish new school houses; and while we dissented from this construction of said act, as in conflict with the Public School Law of the State, and regarded its operation as an encroachment upon the functions of the County School Board, we have notwithstanding acquiesced, being willing that school houses should be built by any authority, so that the pressing wants of the people in this direction might be met.

Under said construction of said act the County Commissioners have, during the past six months, contracted for the

erection of *ten new* school houses, some of which have been completed and are occupied by our schools. The cost of building said houses and furnishing will approximate $19,000.

We take pleasure in stating that all teachers employed in Frederick County, who have had the advantages of instruction and training in our State Normal School, are doing good work. Very respectfully submitted,

D. T. LAKIN, *Secretary.*

FREDERICK, MD., Nov. 12, 1881.

FREDERICK COUNTY.

GARRETT COUNTY.

W. A. BRYDON, *President.* E. H. BARTLETT, *Secretary.*

Prof. M. A. Newell,
Secretary of State Board of Education.

DEAR SIR: The report of the Public Schools of Garrett County for the year ending September 30th, 1881, is herewith respectfully submitted. It will be observed, that while our enrollment is greater than in former years, the average attendance is less, which must be attributed to the severe weather of the past winter, and the condition of our roads, often impassable, particularly for the younger pupils.

The Board has purchased during the year, on very liberal terms, two buildings, formerly occupied as school houses, but for which rent was paid. The new school houses erected are not as well supplied with suitable furniture as might be desired; this is a serious evil, but one we must only hope gradually to overcome.

Our schools were kept open three terms, but I regret to say our financial condition, and the demand upon us for new buildings, will hardly justify us in continuing them so long the coming year.

Very respectfully, yours,

E. H. BARTLETT, *Secretary.*

GARRETT COUNTY.

HARFORD COUNTY

ARTHUR VOSBURY, *President.* WM. H. HARLAN, *Secretary.*

Prof. M. A. Newell.

DEAR SIR: Owing to the severe winter and the fact that several of our schools were badly crippled by scarlet fever and diphtheria, our average enrollment and average attendance are somewhat smaller than last year. The prospect for the present year is excellent, and we will without doubt largely increase both enrollment and attendance.

The Board during the past summer secured the services of the present and a former County Surveyor and had the school district lines revised to suit the present condition of the schools, the old division having been ignored for ten years past in building houses. This was done for two reasons: 1st. To prevent the pressure of new districts by showing that the present number of houses was sufficient, and that new houses should be built only to replace those worn out. 2d. The Board believed that a strict interpretation of the law confining the pupils of each district to the school of that district would cause the patrons to force the trustees to secure good teachers, and thus greatly increase the interest in and efficiency of the schools.

The ultimate aim of the Board is to make in each Election District a school where those pupils, who desire to pursue their studies beyond the 6th Grade, may be taught, and which may also be used as training schools for those who wish to become teachers. This would greatly relieve the now overworked teachers of the primary schools, and would place within the reach of all the children of the county the advantages of thorough instruction in the studies of the higher grades without increasing the cost of the schools.

Our display at the last Agricultural Fair was a great success, and called forth the unqualified praise of all who examined it.

The examination for the prizes mentioned in my last report produced a large number of very creditable papers, and proved conclusively that our Public Schools can and do give thorough instruction.

In presenting their report to the County Commissioners last spring, the Board called attention to the low salaries paid to our teachers and the short school year, which make it hard to hold the corps together, since the neighboring counties offer far more advantageous terms.

They were unable to secure a larger levy for schools than that of 1880; but four cents on the hundred dollars was levied to build five new houses.

Four of these were put under contract and are either completed or nearly so. The sum levied for the fifth (Bel Air) was inadequate for the purpose, but a lot has been secured and the house will be erected next summer, if the necessary funds can be raised.

The Board also called attention to the fact that the State levy for colored schools was not sufficient to run those schools (as required by law) as long as the white schools; and asked that one thousand dollars be levied to enable them to give to the colored people of the county equal advantages. This was done because the patrons of these schools were fully alive to the benefit their schools were conferring upon them, and had supported (as this report shows) two schools at little expense to the Board except for books. The request however was denied.

I believe that we may safely say that our schools are slowly overcoming the difficulties which have hampered them for so many years, and are each year increasing in efficiency; and that the earnest work of our teachers is making such an impression on the people that the welfare and necessities of the schools will be in the future more carefully consulted.

Very truly, yours,

WM. H. HARLAN, *Secretary.*

HARFORD COUNTY.

			$22,197 27

KENT COUNTY.

R. W. JONES, *President.* EBEN F. PERKINS, *Secretary.*

To the State Board of Education:

In addition to the statistics we will add that we have a successful County Teachers' Association, which met regularly each term during the year.

At the close of the school year, the last of June, a Teachers' Institute was held, at which the Principal of the State Normal School presided, and gave much useful information.

Except in some unimportant points, we still neither feel nor see any necessity for change in the present school law.

R. W. JONES, *President.*

EBEN F. PERKINS, *Secretary.*

KENT COUNTY.

MONTGOMERY COUNTY.

A. B. DAVIS, *President.* S. R. WHITE, *Secretary.*

Prof. M. A. Newell.

Dear Sir: The annual report of the Public Schools of Montgomery County for the year ended September 30, 1881, is herewith respectfully submitted.

The Board has labored under many disadvantages the last year. The books of the late Board were withheld until the 8th of March last, a period of fourteen months. The old debt, as far as can be ascertained from the books and advertising, is about $19,500.

The order and certificate system has been abandoned, and the collectors are required to pay promptly, as it is the purpose of the Board to run the school upon a cash basis.

With the co-operation of the teachers, owing to the want of funds, the schools were kept open seven and a half months the past year, at a reduced salary, every dollar of which has been paid.

The County Commissioners levied all that was asked for the incoming year, and it is believed that with economy and good management the schools can be kept open for the full ten months; at any rate, if on account of extraordinary incidentals, furniture, &c., it should prove inadequate, the schools will *not* be continued a day longer than the funds will justify.

The old debt will be cancelled when funds are placed at the Board's disposal, which, it is to be hoped, will be done this winter, and for which an application will be made to the legislature.

The report for the fall term ended November 15, 1879, and up to the day the books came into the possession of this Board, of the receipts and disbursements of the late Secretary is herewith submitted, which, added to the receipts and disbursements, as per report September 30, 1880, will show the amount for that school year to be $34,091.41, instead of $23,207.66.

The county has been redistricted, and the several school districts adapted to the ten several election districts in place of five as heretofore.

From the present outlook the Board feels much encouraged, notwithstanding the many obstacles it had to encounter, at the general condition of the schools in the county, its financial prospects, the interest of teachers, trustees and patrons; and believe that in the future the public school system will grow in favor with the people, and prove a greater success than ever before. Very respectfully,

S. R. WHITE, *Secretary.*

MONTGOMERY COUNTY.

Disbursed by Peter & Henderson, attorneys	354 68	
		$10,883 75

Am't Receipts and Disbursements as per report Sept. 30, 1880	$23,207 66
Add the above statement	10,883 75
Total September 30th, 1880	$34,091 41

PRINCE GEORGE'S COUNTY.

DR. W. W. DUVALL, *President.* T. S. STONE, *Secretary.*

Prof. M. A. Newell:

We send you by to-day's mail our annual report of the Public Schools of Prince George's County for the year ending September 30, 1881.

The tabular part of the report has been carefully made out, and is, we believe, accurate in every respect.

The entries in financial tables, giving cost of books and stationery, and that showing the amount of bank advancement, are the only ones in the report which, in our estimation, need any explanation.

Of the $910.36 credited as cost of books, $566.88 was in settlement of old account.

Of the $221.13 credited under same heading in financial table of colored schools, $176.16 was returned to the school treasury, from sale to school children during the year ending September 30, 1880, as will appear from school report of that year, but the amount was not charged to colored fund until after the commencement of the present year.

In order to meet all liabilities promptly with cash, it became necessary to anticipate the receipts from county school tax. The aggregate of the different sums borrowed at different times is large, but the cost was comparatively slight, and the last note was taken up shortly after schools were closed.

We have instituted during the past year an entirely different method of supplying our schools with books, and do cheerfully recommend the same to any county still vexed with the solution of the book question.

We contract with a reliable merchant, resident in our county town, to supply the schools with books and stationery at twenty per cent. advance upon the lowest cash prices that can be obtained by the Board; a printed price list is furnished to each teacher, and the merchant is paid in cash upon presenting teacher's order, stating the money value of books furnished. In case of indigent children, the order must be signed by Local Trustees.

This system is attended with no waste and with but slight additional cost to patrons.

We have built and furnished during the past year three houses, and will build this Fall five more, and thoroughly repair and modernize three of the old buildings.

The new buildings add to the number of schools reported last year. One of these houses is to replace an old school closed several years ago; the other was built in compliance with an act of the last legislature requiring the School Commissioners to erect a school house in the town of Bowie, at a cost of not less than six hundred dollars.

The final examinations show that the result obtained in the school room were not so satisfactory as for the previous year, owing no doubt to the irregular attendance during the severe weather last winter.

Still we feel fully justified in reporting our schools as progressing in the right direction.

Our financial condition is still endurable; we are free of debt, with a balance of over seven thousand dollars due from county school tax.

W. W. DUVALL, *President.*

T. S. STONE, *Secretary.*

CENTREVILLE, Oct. 24, 1881.

Prof. M. A. Newell.

DEAR SIR: I have sent you by mail my annual report. It contains all you want to know about school matters in Queen Anne's County. If we have not improved much in numbers, &c., we hope we have not gone back any. I can make the same statement that I made in my report last year, that we have built two new houses, and doubled the size of another, fitting it for a graded school with two teachers.

As heretofore our schools were open for the whole school year, and we are prepared to keep them open for the whole of the next year.

Very truly, yours, &c.,

JAMES W. THOMPSON,

Examiner and Secretary.

QUEEN ANNE'S COUNTY.

Summary of School Statistics for the year ending June 30, 1881.

	1880.	1881.
Number of School Houses—Frame, 49; Brick, 6	53	55
Number of Male Teachers (Principals)	28	30
" " Female " "	25	23
" " Male " (Assistants)	1	1

ST. MARY'S COUNTY.

JOHN F. DENT, *President.* GEO. THOMAS, *Secretary.*

Prof. M. A. Newell,
Secretary of State Board of Education.

DEAR SIR: In transmitting my report for the scholastic year just ended, I desire to say something in explanation of the smaller enrollment and average attendance therein exhibited as compared with the features of the report for the previous year.

A closer examination and comparison with the previous year's report will show that there is an actual increase in the number of white pupils, the falling off being entirely with the colored schools. The early and severe winter, followed by a late and unfavorable spring, seriously retarding farming operations, sufficiently accounts for the decreased enrollment of the colored pupils as well as for the general low average attendance.

The increased number reported in the higher grades is a source of encouragement, as tending to show an advance in the efficiency of the schools, and the figures on this point tell no untrue tale; for I can say, without fear of contradiction in any quarter, that our schools have advanced and are still advancing. Unfortunately there are exceptions, but these are the cases where local interest has not been sufficiently aroused as to the need of good primary instruction, or where personal feeling, or worse still, indifferentism has kept in place, as an instructor, one who for some reason is entirely out of place in his position.

A serious drawback is to be found in the miserable charac ter of many of our school houses, which we are replacing, as

rapidly as our means will justify, with sufficiently comfortable and well arranged structures; but at the present rate it will be many years before all the needs in this direction are supplied.

During the past year we have erected a building of three rooms for the accommodation of the two Leonardtown schools, which, as one school, will now be conducted as a graded school. The school board office will also be in the same building. The school house that was burned last year, presumably by an incendiary, has been replaced by a better one.

Feeling very sensibly the need of proper school accommodations, I have broached the subject of an increased tax rate for building purposes, but I have found little encouragement. The expenditure of about $15,500 per annum in the cause of education for the white children alone, of this county, seems to strike some people with amazement. Few seem to reflect how little way the $9.50 per capita that it costs to educate our children would go were the public schools not in existence, and if we were to attempt as individuals to secure like educational advantages in private schools; fewer still seem to appreciate the fact that our direct county levy furnishes less than $2.00 of the per capita cost.

Very truly, yours,

GEO. THOMAS, *Secretary.*

ST. MARY'S COUNTY.

SOMERSET COUNTY.

B. T. I. B. JONES, *President.* SAM. H. ROBERTSON, *Secretary*

Prof. M. A. Newell.

DEAR SIR: At the commencement of the year ending September 30, 1881, as for several previous years, there was a heavy burden of debt hanging over us; the School Board thought it their duty to try to reduce, and, if possible, to liquidate entirely this debt.

To accomplish this there was necessity of economy in every possible way. An order has already been granted for the building of a school house, at a cost of more than one thousand dollars; this of course had to be done, and was done. Beyond this we have not gone, except in making some necessary repairs.

The Board also thought it wise to shorten the school year to seven and one-half months.

By doing so, together with an increased income from the dredging licenses, and a prompt payment by our county collector, we are able to report our schools free from debt. The county commissioners have added two cents to the levy for school purposes, and we have good reason to hope that a growing appreciation of the importance of public instruction will gradually bring about a more generous policy in the future.

Very respectfully, yours,

B. T. I. B. JONES, *President.*

SAM. H. ROBERTSON, *Secretary.*

SOMERSET COUNTY.

TALBOT COUNTY.

HENRY P. HOPKINS, *Pres.* ALEXANDER CHAPLAIN, *Sec.*

Prof. M. A. Newell,
Secretary State Board of Education.

DEAR SIR: In compliance with the requirements of law, I have the honor to submit herewith the annual report of the Board of County School Commissioners of Talbot county for the scholastic year ending July 15, 1881, and the fiscal year ending September 30, 1881.

It is made our melancholy duty to announce the death, since our last annual report, of the late President of our Board, William M. Hollyday, Esq. He was a graduate of Princeton College, and a man of culture and large information. Just and conscientious in the discharge of official duty, his counsels, as a member of the School Board, were uniformly marked by firmness, moderation and wisdom.

We expended during the year $2,667.17 in building school houses, exclusive of furniture; and we have contracted for building three more houses, which are now partly completed.

For the Easton High School building we claim that its arrangement for heating and ventilation is almost perfect. Fresh air is introduced from the outside and passes through the heater, which insures pure heated air for the school rooms; and there is provision for taking the foul air from the rooms by a flue that is heated by the smoke flue. Boynton's Ventilating School Room Heater, after many experiments, is the best and cheapest, perhaps, for ordinary school houses in villages and rural districts.

At the Teachers' Institute held at Oxford the last of May, every teacher was present but one. The people of Oxford

manifested great interest in our meetings and evening lectures, and they entertained our teachers at their homes without charge. The Institute was a success, not only socially, but also in the character of the instruction and lectures. Much valuable aid was rendered by Miss Kane and Miss Newell as instructors, and we thank them for their kind and voluntary help.

We opened a Normal Institute for colored teachers on the 19th day of September, which continued for a week. Our colored teachers are improving, we think, in scholarship and teaching ability.

The financial condition of the Board is very satisfactory. The Board had no indebtedness at the close of the fiscal year, except the amounts set forth in the accompanying tables; and the amount due and unpaid to the Board from county levy, judgment, &c., was $3,393.01, exclusive of interest.

With many thanks for your friendly counsel and uniform kindness, I remain, very respectfully,

Your obedient servant,

ALEXANDER CHAPLAIN, *Secretary.*

TALBOT COUNTY.

WASHINGTON COUNTY.

WM. RAGAN, *President.* P. A. WITMER, *Secretary.*

Prof. M. A. Newell:

We submit herewith the annual report of the Public Schools of Washington County for the year ending September 30, 1881.

A few incidents worthy of notice have marked the operations of the schools during the past year, the principal of which, as affecting the schools themselves, is the decrease in both aggregate and average attendance.

The number of different pupils enrolled for the year falls 259 below the number reported for the year previous, and the average attendance falls 533 below that of 1880.

We attribute the decrease principally to the severity of the winter of '80-'81, supplemented to some extent by the general prevalence throughout our county of diseases affecting children.

Another fact worthy of mention is that the aggregate expenditure for schools for the year just closed is less than for any previous year since 1869, and this, notwithstanding, we have 50 more teachers and 1,500 more pupils than at that time.

At the close of the last school year Prof. R. S. Henry, who took charge of our County High School at its first establishment in 1877, and conducted it with singular success for four years, tendered his resignation, and was succeeded by Mr. George A. Harter, a graduate of St. John's, and for two years a tutor in that institution.

It is gratifying to report that, under Prof. Harter's management, the school is fully sustaining its excellent reputa-

tion, and the number of pupils enrolled has largely increased.

We have entered upon the new year with every indication of a year of prosperity, and feel confident that our enrollment and attendance will reach the usual standard.

Respectfully submitted,

WM. RAGAN, *President.*

P. A. WITMER, *Secretary.*

F. C. TODD, *President.* THOS. PERRY, *Secretary.*

Prof. M. A. Newell.

DEAR SIR: We herewith send you our annual report. There is but little that calls for special attention. One of the most important changes is the adoption of a cash system. Till within the present year, a system of giving orders on the collector of taxes has prevailed. Such a system works a great inconvenience to all parties except the collectors. With our present system we always solve our indebtedness on demand. Our paper is as good as drafts on any bank.

Our cash balance is larger than usual. The reason for this is that teachers' salaries did not run so high this year. We pay in proportion to the average attendance, consequently salaries run higher during mild winters than severe. Of this cash balance we are trying to create a sinking fund to use for building a high school building.

We report our schools in good working order. We are establishing graded schools throughout, wherever the material is sufficient, to the extent of our means.

F. C. TODD, *President.*

THOS. PERRY, *Secretary.*

WICOMICO COUNTY.

WORCESTER COUNTY.

REV. WM. DALE, *President.* GEO. M. UPSHUR, *Secretary.*

Prof. M. A. Newell.

DEAR SIR: I herewith submit the annual report of the Board of County School Commissioners of Worcester County for the scholastic year ended June 30th, 1881, and the fiscal year ended September 30th, 1881.

It will be observed that the enrollment of pupils during the year was not quite so large as in the preceding year. I can account for this small falling off only upon the ground of the extremely cold weather of last winter. It will be seen that the lower grades, composed of the smaller children, suffered most. In other respects the schools run along about as usual.

With the kind assistance of Mr. Joseph W. Drexel, of the city of New York, the Board built quite a handsome school building at Klej Grange (School No. 3, Dist. No. 8) during the year. The house is two stories in height, and is nicely finished inside and out. The building cost $1,516.80, of which Mr. Drexel contributed $400.00, besides giving the furniture.

I must apologize for the small number of school visits paid by me during the year. I was sick at various times during the fall and winter, and was advised by my physician not to expose myself in the open air, as I would be required to do in riding through the county.

Very respectfully,

GEO. M. UPSHUR, *Secretary, &c.*

WORCESTER COUNTY.

Summary of School Statistics for the year ending June 30, 1881.

			1881.	1880.
